ication		
ogramme:		
Erasmus study programme		
Course contents and learning outcome:		
The aim of the course is to provide exchange students with basic knowledge on the Hungarian society, on the educational system and on educational & rehabilitation services for persons with special needs. Basic issues of Hungarian special educational support are shortly presented in general and in relation to the different areas of disabilities. The lectures and discussions are held by members of the academic staff of the different departments. Additionally, visits to various schools and service centres are organised so that international students could gather some practical experience.

The course is offered within the following programme:

Erasmus study programme

Course contents and learning outcome:

<u>Aims</u>: The course provides a concise introduction to learning motivation theories, to basic learning motives and their role in the self-regulated learning of students with special educational needs.

Topics:

- Learning motivation and its relationship with school achievement
- Motivational styles of SEN students
- Self schema and special educational needs
- Goal-orientation and classroom goal structures
- Inclusion and motivation

Teaching and learning methods:

The course comprises of a theoretical and a practical part. Accordingly, teaching and learning methods include presentations, explanations and analyses of research results as well as discussions, analyses of pedagogical situations and video classroom observations.

Assessment:

oral presentation and written assignment

Braille and Moon – tactile writings for the blind Level of the course:		
Level of the course:		
<u>BA / MA</u>		
Language of instruction:		
English / German		
Prerequisites: 30 credits in Special Education or Education or Social Work or Psychology; good command of English		
Instructor – given name and SURNAME: Ms. Emese PAJOR		
Faculty and department: ELTE Bárczi Gusztáv Faculty of Special Education,		
Department of Visual Impairment		
The course is offered within the following programme:		
international exchange study programme		
Course contents and learning outcome:		

- Tactile alphabets: Valentin Haüy's system (in italic style)
 - James Gall's "triangular alphabet,"
 - John Alston's system
 - Samuel Gridley Howe's Boston Line
 - New York Point, a system of points invented by William Bell Wait
 - Elia Chepaitis's ELIA Frame tactile alphabet etc.
- Braille reading and writing
- Moon reading and writing

<u>Aims</u>: The course supplied is for students who want to read and write Braille and Moon on her/his <u>own</u> <u>language</u>. The goal of the seminar is that students can use both tactile systems on their own.

Teaching and learning methods:

Presentation, discussion; lots of practice.

Compulsory reading:

http://www.afb.org (American Foundation for the Blind)

Cheadle, B. (1996) (Ed). Future Reflections. *The National Federation of the Blind Magazine for Parents and Teachers of Blind Children*. (15) 1. <u>https://nfb.org/images/nfb/publications/fr/fr15/issue1/f1501tc.html</u> http://www.moonliteracy.org.uk/whatis.htm

The course is offered within the following programme:

international exchange study programme

Course contents and learning outcome

Topics:

- Theoretical background of accessibility (empowerment, self-advocacy) and introduction to Universal Design, Design for All, etc.
- Legislation and equal opportunities, internationally and in Hungary.
- Principals of designing and developing tactile maps, useful equipments for daily living activities: analysis and demonstration, examples of good and not good signage
- Good practices in accessible exhibitions and public transportation
- Definition, aim, principles and levels of modification
- Adaptation of the learning environment
- Adaptation of the learning material (enlarging, tactile, the English Braille Gr.I.)
- Optical and electronic devices
- Verbal description and narration

Aims:

- To achieve basic knowledge on the use of environmental modification for persons with visual impairment theory
- To gain competencies in how to adapt the physical and info-communication environment for persons with visual impairment practical experience

Teaching and learning methods:

• Interactive lectures, practical work under blindfold and low vision simulation, pairwork, teamwork with cooperative and project methods

Compulsory reading:

Course requirements:

Assessment in the course is based primarily on a *research paper* and on an *oral presentation* depending on the students' choice. Beyond developing a paper or a presentation students are required to read the compulsory texts and to contribute to the class with active co-thinking and regular participation.

Research paper

Students are requested to choose a 'question', a 'problem' or a 'theme' introduced and discussed in the class and encouraged to consult with the responsible instructor to gain access to further resources regarding their chosen field. The paper should be 8-10 pages long, double spaces, 12-pt font, Times New Roman, 1.5 inch margin on the sides.

It can be written individually or by a team of two students.

Oral presentation

Students who choose to hold an oral presentation are required to prepare and present a 'question', a 'problem' or a 'theme' from the content of the course in front of the class. They are encouraged to consult with the actual instructor to gain deeper insight concerning their interest. A presentation should not take more than 20 minutes, multimedia devices can be used.

The presentation should be developed individually or by a team of two students. Each presentation is complemented with a short (4-5 min.) critical reflection by a fellow student.

BUT there will be changes in the description!

 Equality models Discrimination 'Protected grounds' Reasonable accommode Universal design and i International regulation 	Rights n the Rights of Persons with Disabilities and its Paradigm Shift dation/adjustment and its perspective ts perspective n and the principle of equality isonable accommodation and universal design
equality, focusing on the possib	y' in a human rights context, we are going to analyze the questions of le role of universal design and of reasonable accommodation.

I. Theoretical ground. Human rights system, antidiscrimination law and equality.

II. Legal background and practical application of the reasonable accommodation and universal design. III. 'Good practice', possible solutions.

The aim of the course is the improvement of the critical way of thinking and the realization of possible solution in connection with reasonable accommodation and universal design.

Teaching and learning methods:

Students are required to read the materials before each class. Lectures are held by the instructor, class discussions, analyses of textual, visual and audible resources, team works and debates are core methods.

Compulsory reading:
